

LYNX

Honeywell

**Keeping Your Family
Protected...**

...and Connected.

For peace of mind, you need to know that what you cherish most—your family and your home—are safe and secure. Look no further than LYNX.

Honeywell's state-of-the-art security system provides superior protection, watching over your property and the people you love. But LYNX does so much more than keep your family safe...it also keeps them in touch. When used with Total Connect remote services, LYNX lets you take advantage of all of the amazing benefits next-generation technology can provide—helping you enhance communication, strengthen bonds and stay connected to your home and family whether you're across the street or across the country!

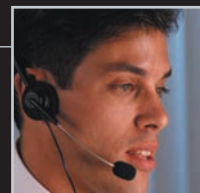

LYNX. It's just part of what we do at Honeywell to keep your family protected...and connected. Welcome home to peace of mind.

Security Made Simple

The user-friendly LYNX puts optimum security at your family's fingertips. Features include a full 16-button keypad, an easy-to-read LCD display and a voice response system that speaks to you in plain English. The sleek, attractive unit blends perfectly with any décor and can be placed on a wall or tabletop.

Two-way voice lets central station operators listen in and talk to you when a signal is received. You'll have the assurance that the proper emergency response personnel will be dispatched should the need arise.

Stay Connected... Anytime, Anywhere!

Whether you're at home or away, LYNX and Total Connect help you and your family stay connected by intelligently utilizing everything today's technology has to offer.

- Control your security system via a virtual keypad using any web browser on a PC, or via SMS on a PDA or cell phone
- Receive important alerts through any text messaging device, including cell phones and PDAs (e.g. receive an e-mail when your child has arrived home safely from school)
- Be notified of activity in various areas of your home (e.g. when the security system has been armed or disarmed, when doors have been opened or closed or when a safe has been opened)
- Utilize optional video services to receive images of specific activity occurring around the interior or exterior of your home

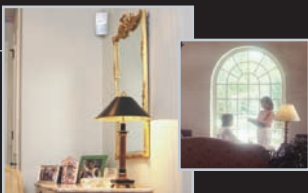

Wireless keypads actually talk to you—announcing system status in clear spoken English.

LYNX can actually call and alert you to alarms and remind you of important appointments.

LYNX offers easy, fingertip control of indoor and outdoor household lighting, garage doors and select appliances. You'll have peace of mind, knowing that your home and family are safe and sound while enjoying the comforts of home automation.

Protect open areas and windows with motion sensors and glassbreak detectors.

Reliable wireless smoke and heat detectors provide the ultimate protection of life and property.

Ideal for busy households, LYNX's Family Message Center lets everyone record and playback voice memos for one another. LYNX can also be used as a convenient, hands-free speakerphone.
